## Personaliza tu entrega:

### 3. Basándote en un tema de la galería, modifícalo. Indica los elementos modificados

Font settings: weight=bold;  
Corner radius: corners=20px;  
Content: background= #ea95d9;  
Clickable default state: background= #d60b77;  
Clickable active state:  
    background= #ff00e7;  
    border= #ff00e4;  
    text=black;  
    icon=black;

### 4. Explica cómo has aligerado la descarga (Componentes seleccionados/no seleccionados)

#### Interactions

☐ Toggle All

These add basic behaviors to any element and are used by many components below.

☒ Draggable

Enables dragging functionality for any element.

☐ Droppable

Enables drop targets for draggable elements.

☒ Resizable

Enables resize functionality for any element.

☐ Selectable

Allows groups of elements to be selected with the mouse.

☐ Sortable

Enables items in a list to be sorted using the mouse.

#### Widgets

☐ Toggle All

Full-featured UI Controls - each has a range of options and is fully themeable.

☒ Accordion

Displays collapsible content panels for presenting information in a limited amount of space.

☐ Autocomplete

Lists suggested words as the user is typing.

☒ Button

Enhances a form with themeable buttons.

☐ Datepicker

Displays a calendar from an input or inline for selecting dates.

☒ Dialog

Displays customizable dialog windows.

☐ Menu

Creates nestable menus.

☒ Progressbar

Displays a status indicator for loading state, standard percentage, and other progress indicators.

☐ Selectmenu

Duplicates and extends the functionality of a native HTML select element, allowing it to be customizable in behavior and appearance far beyond the limitations of a native select.

☐ Slider

Displays a flexible slider with ranges and accessibility via keyboard.

☐ Spinner

Displays buttons to easily input numbers via the keyboard or mouse.

☐ Tabs

Transforms a set of container elements into a tab structure.

☒ Tooltip

Shows additional information for any element on hover or focus.
